PROJECTS

Built a Music player using Html,Css,Js and Django framework using python at backend

06/2024 Vijayawada

This project developed a web-based music player application using the popular Django framework for Python on the backend and HTML, CSS, and JavaScript on the frontend. The player allows users to upload, store, and play music files, providing a seamless and interactive experience.

- What was a successful outcome of your work? (e.g. Raised \$3,000 for the charity)

Built a website using front end tools

08/2024 vijayawada

Short summary of your work

- This project involved the creation of a dynamic and interactive website using a combination of frontend tools.

SUMMARY

This summary highlights the technical skills and project experience gained as an undergraduate Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning. The projects undertaken demonstrate a strong foundation in AI and ML concepts, as well as practical application of these techniques to solve real-world problems.

Key Skills:

- Programming Languages:** Proficiency in Python, a widely used language in AI and ML, along with other programming languages as required by specific projects.
- Machine Learning Algorithms:** Familiarity with various machine learning algorithms, including supervised learning, deep learning.
- AI Techniques:** Understanding of AI concepts such as knowledge representation, search algorithms, and natural language processing.
- Data Analysis and Visualization:** Ability to clean, preprocess, analyze, and visualize data using tools like Pandas, NumPy, and Matplotlib.
- Framework Proficiency:** Experience with popular AI and ML frameworks such as TensorFlow, PyTorch, or Keras.

KEY ACHIEVEMENTS

Adaptable

- **Project accomplishments:** Successful completion of projects, meeting deadlines, and exceeding expectations.
- **Skill development:** Acquiring new skills or improving existing ones.
- **Teamwork and collaboration:** Contributions to team projects, effective communication, and leadership.
- **Problem-solving:** Identifying and resolving complex issues.
- **Innovation:** Developing new ideas or approaches.
- **Recognition:** Awards, promotions, or positive feedback received.
